# Internal organization for PRINT

# Internal organization for PRINT

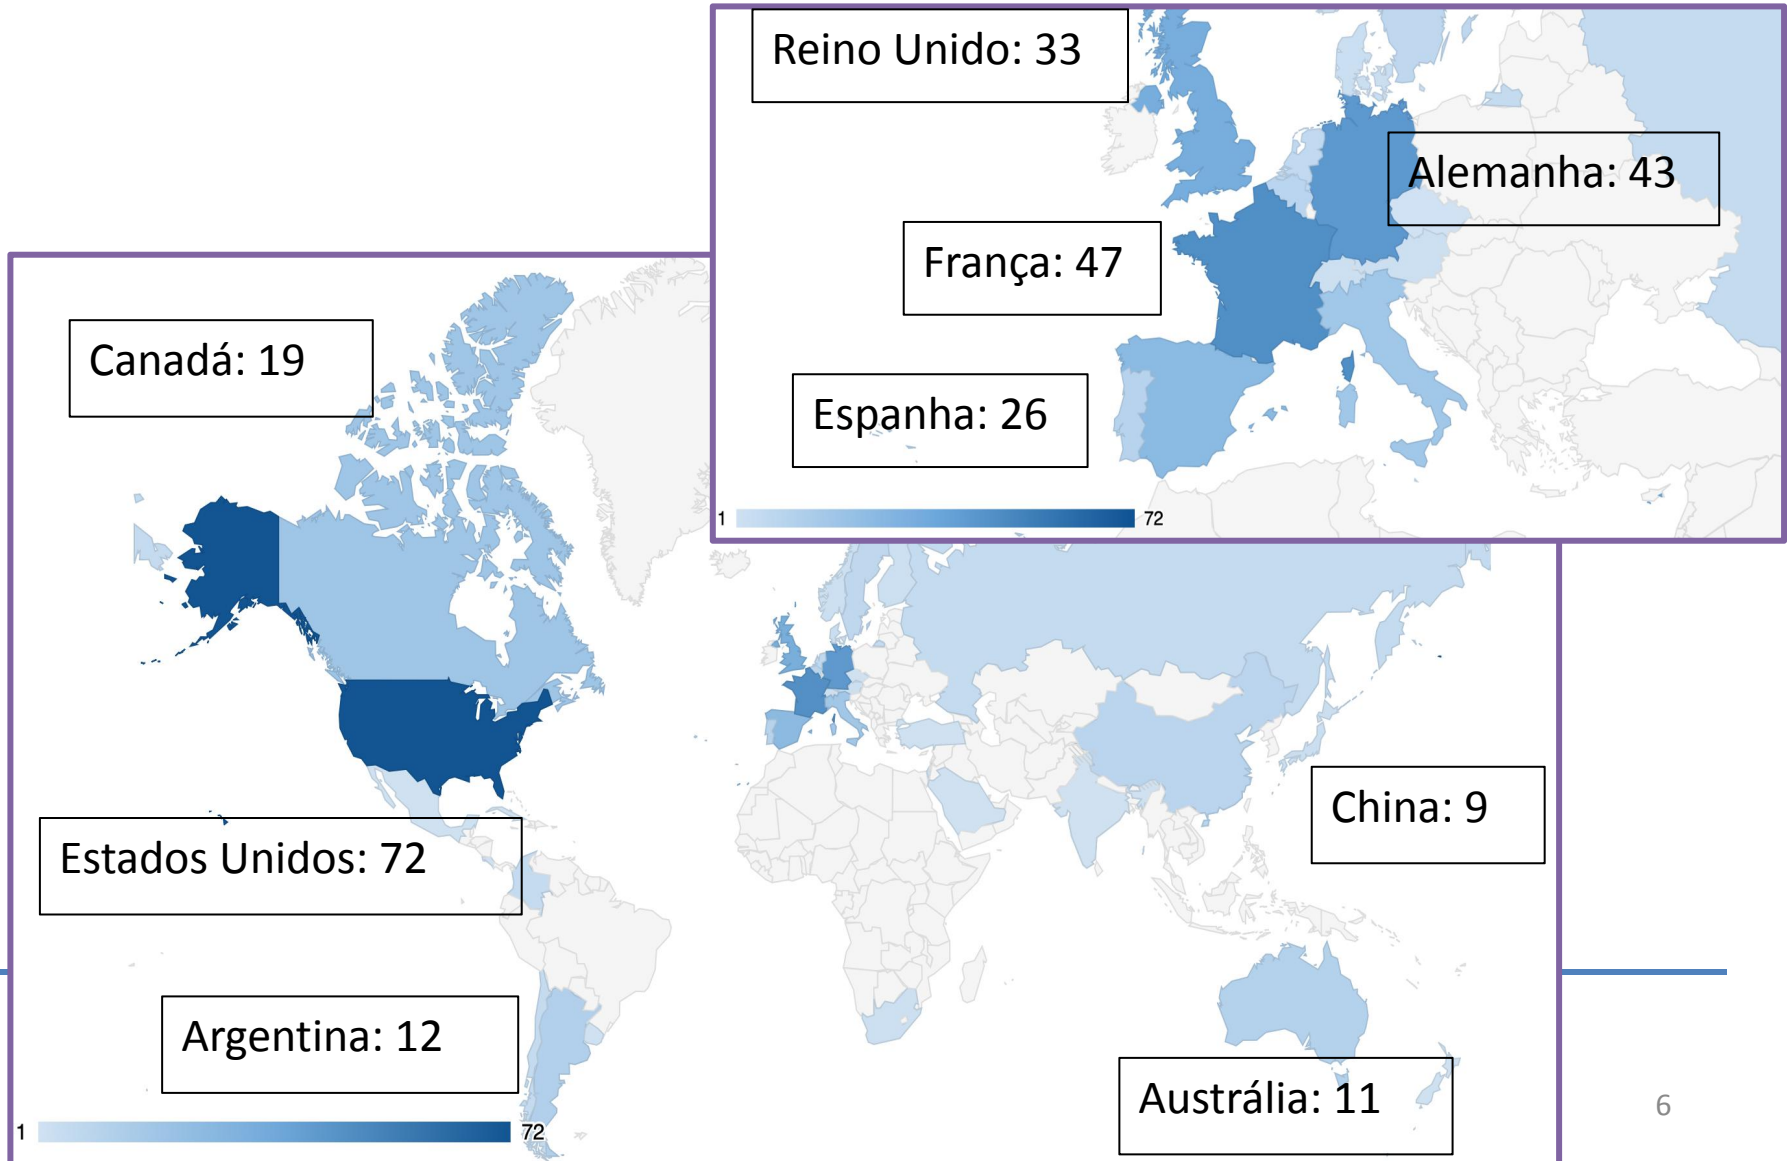

# 8 broad topics

1. **Sustainable development** - diversities; climate change; international cooperation; environmental, social and economic sustainability, including historical, political, cultural, ethical and legal aspects.
  2. **STEAM** - Integration between basic Science, Information Technology, Engineering, Arts and Mathematics .
  3. **Impact**, development, access to and insertion **of new technologies**, artificial intelligence, information technology and robotics **in the future of work**.
  4. **Large-scale health sciences**, translational medicine and its socio-economic impact.
  5. **Energy of the future**, new fuels, non-polluting and/or recyclable energy/fuels.
  6. **Intelligent cities**, complex urbanizations, industry 4.0 and sharing economy.
  7. **Food chain** and agriculture, food security.
  8. **Education of high-level human resources**.
-

# 360 international partners

# Challenges in using the resource

- Internal communication
  - We need to break paradigms!
  - How to manage 65 Ph.D. Degrees?
- External communication
  - Who is in charge of internationalizing research?
- Operational issues due to the size of the Project.
- UFRGS has received a fair budget. But we need to do more than before with the same as before.
